

Entity / Hierarchy Refresh

Mark Molnar
Office of Institutional Analysis

Challenge

- How would we code transaction data to represent common elements across major processing systems (ex. Chemistry majors, chemistry faculty, chemistry space, chemistry accounts)?
- How would we structure these elements to provide a commonly accepted representation of the institution?

What you will learn today:

- What is Entity\Hierarchy?
- Who maintains it?
- Why should I care?
- How is it related to systems like SIRI and HUB?
- How do I submit changes?
- Closing thoughts.

What is Entity/Hierarchy ?

Official system of record for campus operational elements.

- First deployed in the early 1980's.
- Has evolved in response to changing business needs.
- Provides a centrally managed means to identify common elements across systems.
- Updated regularly via manual process.
- Maintained by the Office of Institutional Analysis.

Why should I care about Entity/Hierarchy?

Common structure facilitates the following operations:

- Reporting
- Analytics
- Processing
- Security
- (More)

What details do I need to know?

- Basic structure.
- Common links.
- How to request changes.

Basic Structure - ENTITIES

Officially recognized campus elements assigned a unique 4-digit number to provide common identifier across systems (ex. Chemistry = 0327).

Structural:

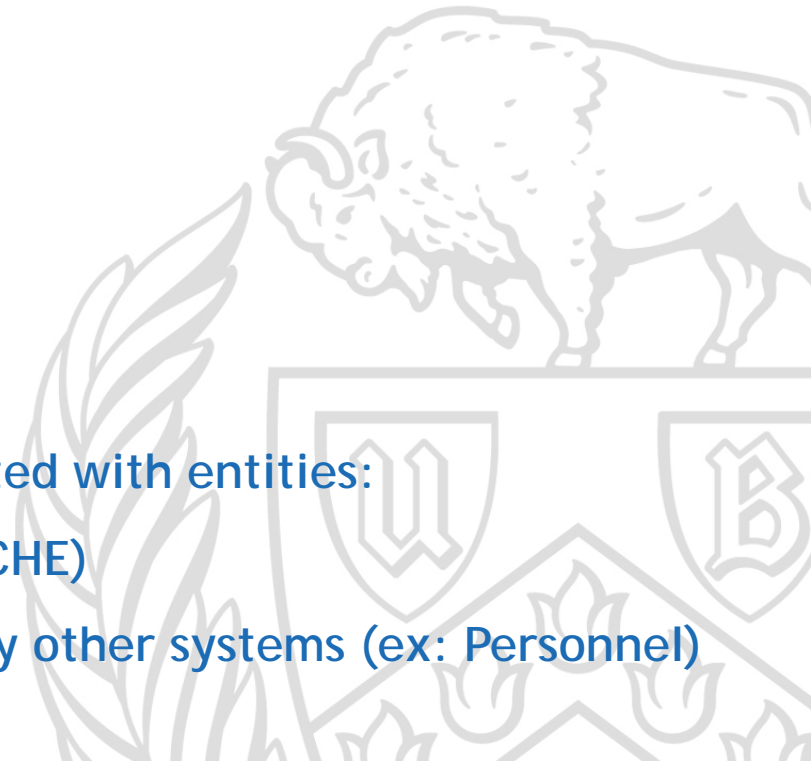

- Departments, Centers, Offices (more)

Functional:

- Majors, Courses, Space (more)

Additional unique dimensions are also associated with entities:

- 3-character abbreviation (ex. Chemistry = CHE)
- Affiliations for reporting and entity usage by other systems (ex: Personnel)

Basic Structure - HIERARCHY

A unique 10-digit number to define *Entity* placement in a logical order.

The 10-digit number is subdivided into five 2-digit groups.

Each 2-digit group *generally* signifies a different level in the campus organizational tree.

There are currently 2 logical orders supporting campus operations:

- Official University
- SIRI Organizational Reporting

Basic Structure - Examples

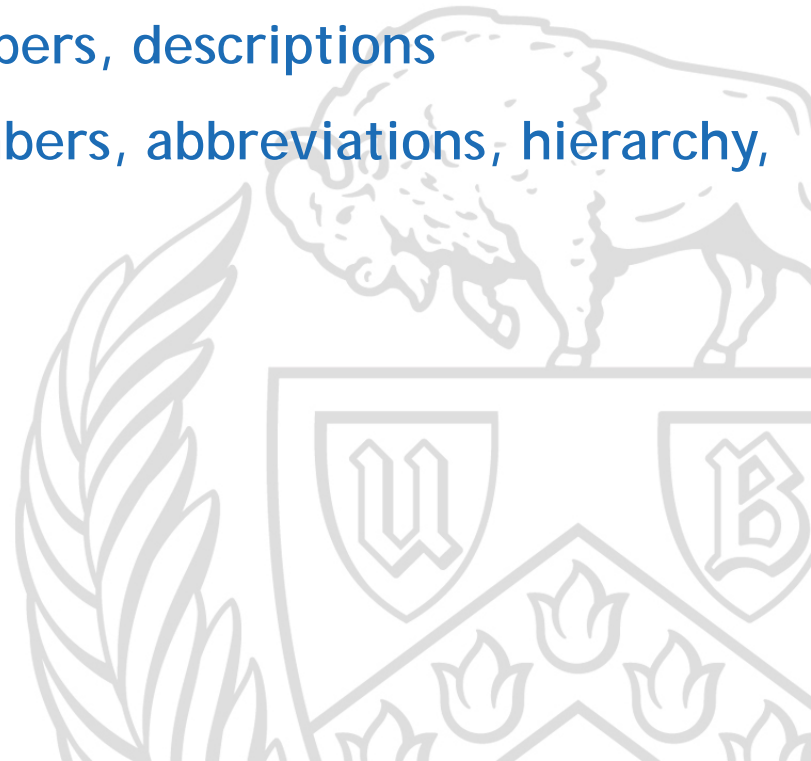

Element	Entity	Abbreviation	Hierarchy
College of Arts and Sciences	1084	ARS	07 27 00 00 00
Chemistry	0327	CHE	07 27 23 00 00
Medicinal Chemistry	0510	MCH	07 27 23 01 00
Nursing General Space	1504	NGS	08 14 00 00 01
Baldy Center	1481	BCT	07 10 00 08 00

Common Elements

Entity/Hierarchy “DNA” is incorporated in many campus systems:

- SIRI - Entity numbers, descriptions
- HUB - Entity numbers, abbreviations, hierarchy, descriptions
- Others

Common Elements - SIRI

SIRI incorporates common Entity/Hierarchy elements into its processing:

- Underlying financial account numbers are mapped to entities
- Entity names drive major SIRI report groupings

SIRI reporting is driven by a customized Entity/Hierarchy view “tuned” specifically to the policy discussion (ENTITY_0).

Common Elements – SIRI Example

Selections

Purpose (All Choices) ▼	Group (All Choices) ▼	VP / Decanal College of Arts and Sciences ▼	Unit College of Arts and Sciences ▼
Area (All Choices) ▼	Department Anderson Gallery ▼

Trial Balance	Account	Annual	Fiscal	Free	Projected PSR	Projected Free	Beain	Net
---------------	---------	--------	--------	------	---------------	----------------	-------	-----

Common Elements – HUB

- UB's student operations are represented in HUB via Academic Structure.
- HUB incorporates Entity/Hierarchy into Academic Structure:
 - Majors use entity abbreviations (CHE012R0A).
 - Course subjects also identified by abbreviation (CHE).
 - Programs identified by hierarchy (27R3 = CAS Bachelor).
 - Many more.
- Changes need to be carefully considered.

Requesting Changes – Why?

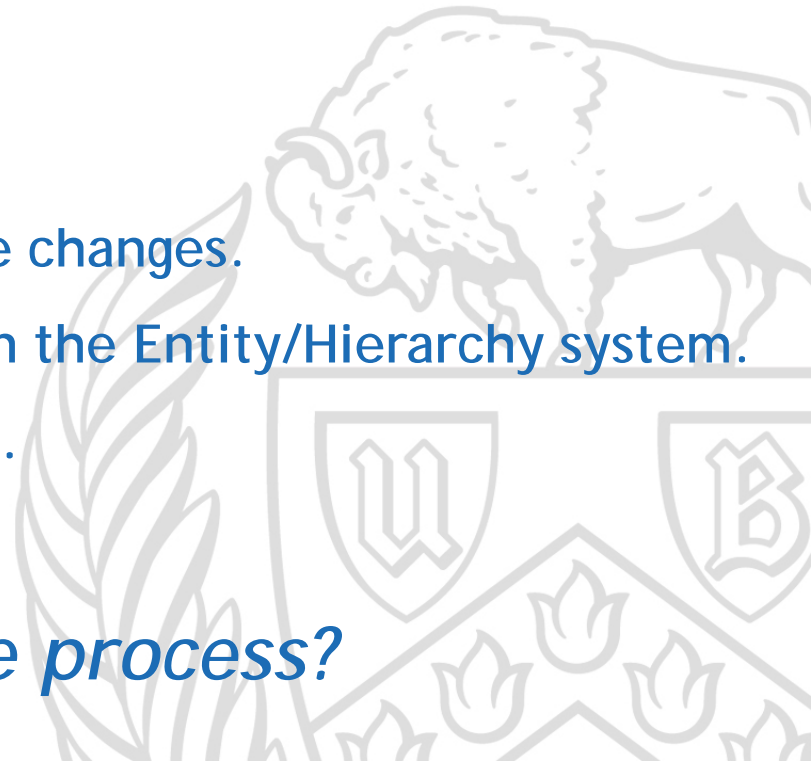

Evolving structural and functional needs drive changes:

- Course name revisions.
- New majors.
- Space additions.
- New departments / name changes.

These need to be correctly recorded within the Entity/Hierarchy system.

Must also consider impact to other systems.

What's the change process?

There is no such thing as a simple Entity/Hierarchy change.

There is no such thing as a simple Entity/Hierarchy change.

There is no such thing as a simple Entity/Hierarchy change.

There is no such thing as a simple Entity/Hierarchy change.

There is no such thing as a simple Entity/Hierarchy change.

There is no such thing as a simple Entity/Hierarchy change.

There is no such thing as a simple Entity/Hierarchy change.

Requesting Changes – General Considerations

Entity/Hierarchy structure must conform to a standardized business model validated by each unit.

- All functional changes will require unit University Business Officer (UBO) approval.
- All structural changes will require UBO, Dean/VP *and* Provost approval.
- OIA will coordinate Provost approval.

Requesting Entity Changes – Process

Discuss your campus need with unit UBO.

Determine if the request is Structural or Functional

If, after discussion, you decide to create a formal change request, do this:

For changes requiring a **new entity**, go to:

<https://www.buffalo.edu/content/dam/www/provost/files/oia/Forms/Entity/Entity-Request-Form-New.pdf>

For changes to an **existing entity**, go to:

<https://www.buffalo.edu/content/dam/www/provost/files/oia/Forms/Entity/Entity-Request-Form-Existing.pdf>

Complete the form

For **FUNCTIONAL** changes:
Obtain UBO approval

For **STRUCTURAL** changes:
*Obtain UBO *and* Dean/VP approval*

Forward completed request form to:

Laura Szefel: lszefel@buffalo.edu

Mark Molnar: mmolnar@buffalo.edu

Implementation must be coordinated with other campus systems.

Quick changes:

*All non HUB Academic Structure/Function
New HUB Academic Function*

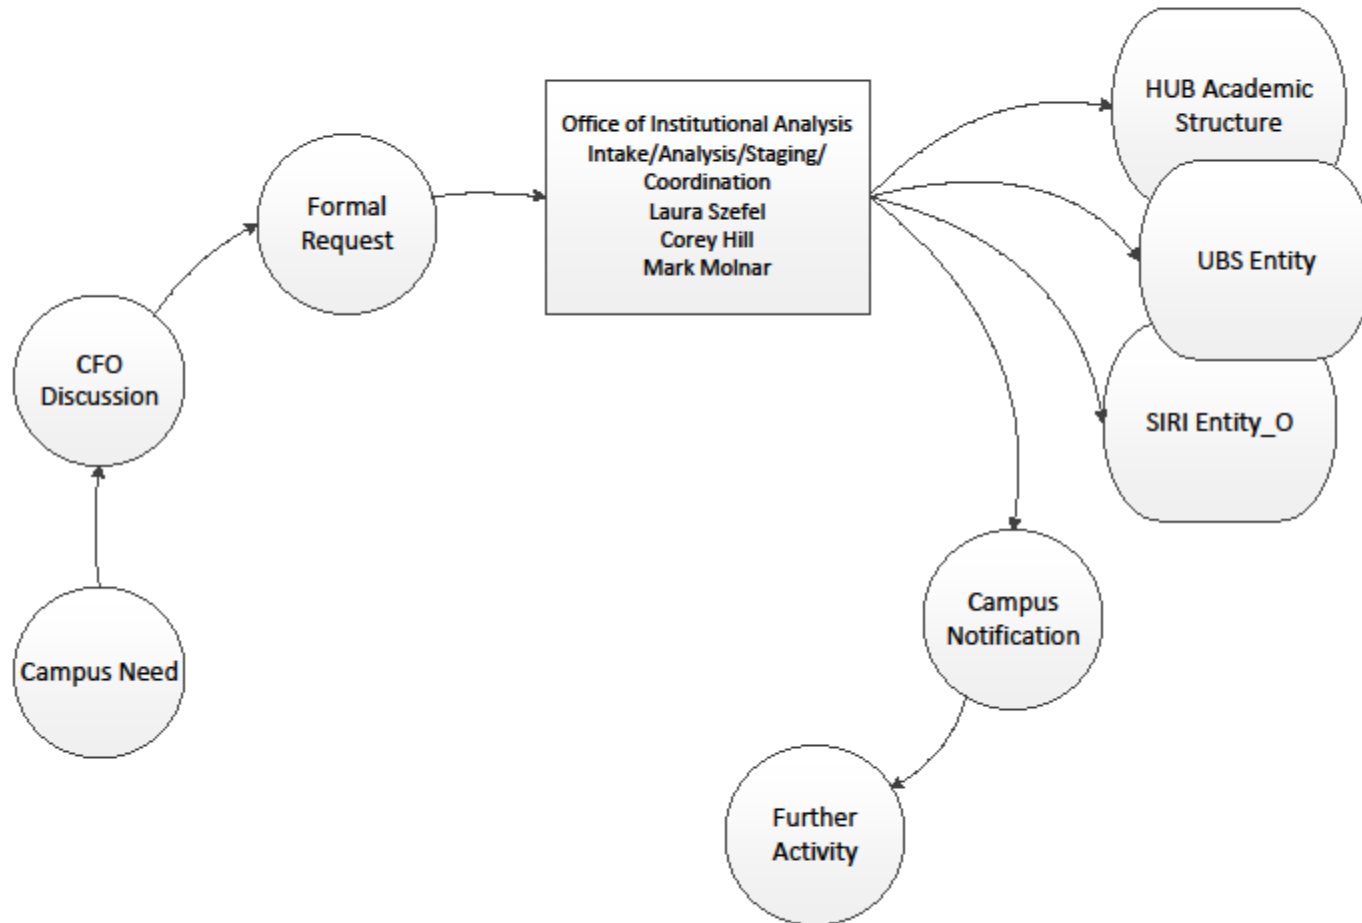

Slow Changes:

*All HUB Academic Structure
Existing HUB Academic Function*

OIA will contact you if additional discussion is required.

Notification will be sent to the campus via email once the change has been made.

Entity/Hierarchy Implementation Process

Implementation – UBS Entity

The screenshot displays a web browser window with the URL https://myub.buffalo.edu/ubs_entity/app/entity-search. The browser's address bar shows a secure connection. The page content is partially obscured by a modal window titled "Edit Entity: Chemistry".

The modal form contains the following fields and controls:

- Entity Number:** Input field containing "0327".
- Abbreviation:** Input field containing "CHE".
- Status:** Dropdown menu set to "Active".
- Entity Long Name:** Input field containing "Chemistry".
- Entity Short Name:** Input field containing "Chemistry".
- CIP Code:** Search input field with the placeholder "Search CIP Codes...".
- HEGIS Code:** Search input field with the placeholder "Search HEGIS Codes...".
- PSS Area:** Dropdown menu set to "Select One".
- Hierarchy:** Input field containing "0727230000".

At the bottom of the modal, there are two buttons: "Close" and "Edit Entity".

The background application interface shows a sidebar with "Entity Management" selected, and a main area with a search bar and search results table. The search results table has one row with "Status" "A" and "0327".

Where Are The Change Forms Located?

Office of Institutional Analysis web site at:

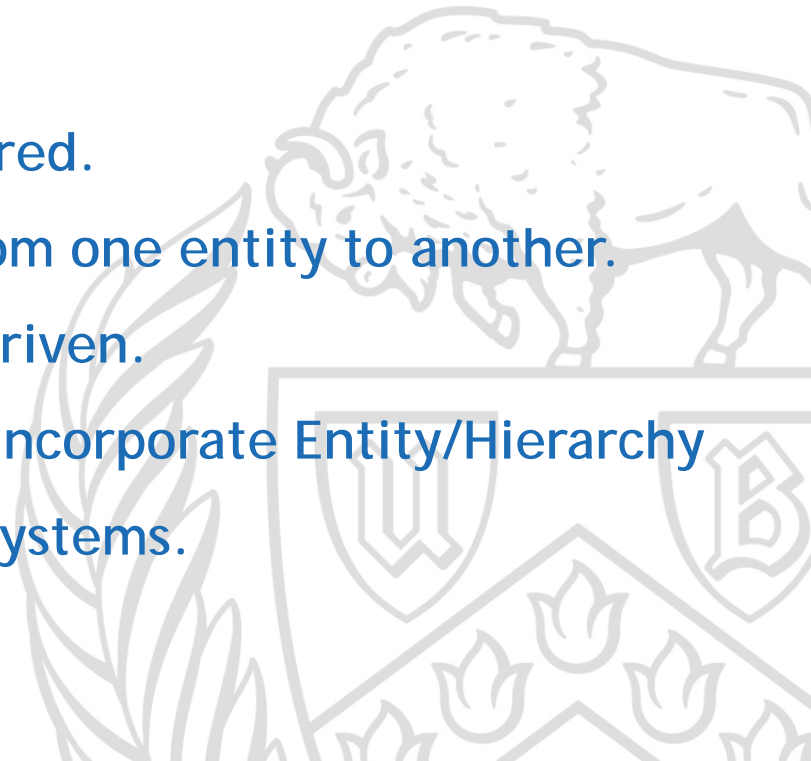

<https://www.buffalo.edu/provost/oia.html>

Follow the “Entity/Hierarchy System” links.

Closing Thoughts

- OIA assumes once an entity request has been moved forward it has been validated by the appropriate UBO.
- Entities are never inactivated - just retired.
- Abbreviations can never be migrated from one entity to another.
- Not all reporting challenges are entity-driven.
- Please stay informed, especially if you incorporate Entity/Hierarchy data and/or business rules within local systems.

Finally

- THERE IS NO MAGICAL AUTOMATED PROCESS THAT SYNCHRONIZES ENTITY/HIERARCHY CHANGES ACROSS SYSTEMS - IT'S ALL DONE BY HAND.

QUESTIONS?
